REAL DANGERS
TO NATO

IN viewing Nato, from this distant Far East community, it appears that the European members are astonishingly blind to the real dangers that threaten them.

Chief among these seems to be the complacency they share, as if any future threat can best be faced by pretending that it will never happen.

In fact, it seems that what was once called the Maginot Line mentality is now the "sheltering under the nuclear umbrella provided by the United States" mentality.

The real danger, the ever present threat, is never realised, and what is worse, the Nato European partners simply fail to appreciate that the nuclear umbrella offers no protection at all against anything but a full-scale Soviet attack.

AND a full-scale Soviet nuclear attack is about the last thing that is likely to happen, if only for the reason that it will be the literally last thing that will happen.

The Nato alliance is well equipped to meet a major onslaught, but it is hopelessly equipped to meet a small skirmish which would involve a major war.

If only it could penetrate the mentality of the European members of Nato, they might be prepared to remedy three obvious weaknesses which are apparent in the alliances.

The first is the shortage of conventional forces which can be quickly switched from one danger zone to another.

THIS past year has taught us, and should have taught the responsible statesmen of the Nato alliance, that if troops could have been rushed to the Congo, Laos, and other spots which have disturbed international serenity, the local disturbances would never have assumed the fearful proportions they have.

The second terrible weakness is the excessive reliance upon nuclear weapons. These weapons are to hand, their destructive powers are known. It is not going too far to say that the associated mental judgment of the Nato statesmen is the use of nuclear weapons is now a calculated risk. While it is difficult to appreciate such a conclusion which really means that the divided areas of the world have agreed upon reciprocal annihilation it is just as difficult to see how a local disturbance is to be put down by relying upon a weapon which while putting down a local skirmish wipes out the world in so doing.

THE third weakness is that there is no interdependence in strategic nuclear tactics.

The three weaknesses mean that the following remedies are needed:

First: the nuclear weapons must be withdrawn from the front line immediately. Very little military risk would be involved.

Second: increase the mobility of Nato's conventional forces without delay.

Third: find, no matter how great the difficulty, some ground of common agreement whereby there is a joint political control of Nato's nuclear forces.

Police launches conduct search in Colony waters
MISSING HK JOCKEY RETURNS

*Mr Ostromoff,
family were
lost in junk*

A staff reporter

ANDREW Ostromoff, one of Hongkong's best known jockeys, and his family were "lost" over the weekend in their junk. Mr Ostromoff and his family were reported missing this morning and seven police launches were sent out to scour the Colony's waters.

At the height of the search Mr Ostromoff brought the junk back to harbour at about 11 am.

Mr Ostromoff, tired and hoarse, told the China Mail at noon today that he, his wife, Ida, and their three children, Andrew Jr., 8, Katherine, 10, and Linda, 12, set out aboard their junk, "Les Girls," from Deep Water Bay on Sunday.

"We intended to reach Blue Island near Rocky Harbour (west of High Island in the Sankung group) and then come back on Monday morning."

Poor weather

"But the weather became poor after we reached Clear Water Bay. At 6:30 am yesterday, we tried to get back but as the sea grew choppy we stayed a while," he said.

"When we restarted, the weather was still not improving, and we tried to sail for Hebe Haven but the visibility was low there. So we sailed into a sheltered small cove near Fat Tong Mun, north of Tathong Channel."

"We did try to come out of the cove again but the waves were too big and we had to return for shelter," Mr Ostromoff said.

"It happened that another pleasure junk of similar size (30 feet) also came into the small cove for shelter."

"The two of us decided to stay overnight until this morning when we sailed back into the harbour through Lyuman Pass on wind only."

Mr Ostromoff did not know the name of the other junk.

Mr Ostromoff told me that he was sincerely sorry for the inconvenience his prolonged absence had caused among friends and relatives and the Marine Police who were sent out on the search.

TYPHOO BETTY

At 12 noon Typhoon Betty was centred about 1,170 miles East South-East of Hongkong and was moving North-West at 7 knots.

Pressure is high over Central China and low over the China Sea.

**Divers search
harbour for
\$259,000 in gold**

Divers this morning continued the search for 1,000 taels of gold allegedly dumped overboard by smugglers when revenue officers raided a freighter in port on Sunday.

A party of 30 Revenue Officers acting on information, boarded the 1,200-ton Star Alcyone berthed there at buoy A10 in the harbour.

An extensive search on board continued until the afternoon but failed to yield results.

Later the Revenue Officers received a further clue that the gold had been dumped overboard during the raid.

**Soviet Deputy
Premier
very ill'**

London, May 22.
Frol Kozlov, 53-year-old Soviet Deputy Premier, and Secretary of the Communist Party Central Committee, was reported tonight to be suffering from heart trouble and to be "very ill."

The London Daily Telegraph said Kozlov's illness accounted for his failure to appear in public for more than a month. He was last seen publicly at the Red Square reception in Moscow for Major Yuri Gagarin, the world's first cosmonaut.

Kozlov is a close colleague of Premier Nikita Khrushchev and has often been mentioned as a future Prime Minister. He went to the United States in 1959 to prepare the way for Mr Khrushchev's visit in the autumn of that year.

He is noted for his acid and sometimes witty sayings on the ways of the West. Once he described the New York subway system as "lousy." On another occasion, he jokingly offered to buy back Alaska for the Soviet Union for \$200 million.

The Telegraph based its account on a report by David Floyd, its special correspondent on Soviet affairs.

"The illness will aggravate the problem of leadership with which the Russian regime is confronted," Floyd noted.

"There is a serious shortage of capable men with strong personalities in the upper reaches of the Russian system."

The leaders regarded as closest to Mr Khrushchev are Deputy Premier Anatol Mikoyan, 66, who has survived Western speculation about his demotion; Alexei Kosygin, 57, Soviet First Deputy Premier; Mihail Suslov, 59, the Soviet Communist Party's top ideologist; and N. A. Mukhlinov, 44, a member of the Party's Central Committee.—AP.

**Divers search
harbour for
\$259,000 in gold**

Divers this morning continued the search for 1,000 taels of gold allegedly dumped overboard by smugglers when revenue officers raided a freighter in port on Sunday.

The vessel was immediately placed under surveillance, while the Officers sent for two naval divers to comb the sea bed in the neighbourhood.

The divers have been searching for three days. The Star Alcyone, scheduled to sail on Sunday, left port this morning for the Petium Gulf via Singapore.

SUPREME COURT SAYS

**3 U.S. turncoats
entitled to war
prisoners' pay**

Washington, May 22. Three American soldiers alleged to have helped the Communists when captured during the Korean war are entitled to prisoner-of-war pay, the U.S. Supreme Court decided on Monday.

The three refused repatriation after the war, but changed their minds after 18 months in Communist China and returned to the United States in 1955.

Justice Stewart delivered the unanimous decision.

The decision applied to claims by Otho G. Bell, for \$1,455; William A. Cowart, for \$4,991; and Lowrie W. Griggs, for

statutes. Hannon contended that as a result, all future servicemen stand in danger of having their pay retroactively stopped by a disbursing officer who feels that they are guilty of some act of misconduct."

The Justice Department, fighting the claims, said the case was the first in U.S. history in which captured American soldiers "served an enemy of the United States and then sued for pay for the period in which they were doing so."

George S. Leonard, Justice Department attorney, told the Supreme Court that actions of the three "appear to have amounted to the military equivalent of treason."

The Justice Department argued that they acted as informants within prison camps, gave Chinese the names of prisoners who planned to escape, and as a result loyal American prisoners were bayoneted, put in solitary confinement and punished in other ways.—AP.

Two die, 11 hurt

**BLACK DAY
IN BRITISH
MOTOR RACING**

London, May 22. Two men died and about 11 others were injured in a black day on British car and motor cycle race tracks today.

At the Whit Monday meeting at Goodwood, the big crowd saw 34-year-old Roy Bloxham flung from his Jaguar like a blazing torch when it crashed and caught fire in the last event of the day.

Bloxham, who has been racing for six years and whose wife, Jean, is also a racing driver, was taken to hospital and died after admission.

ON A BEND

Earlier, a motor cyclist, N. Bramhall, died when he was thrown from his machine after it touched a bend during a practice session at Oulton Park, Cheshire.

About eight other riders were hurt during practice sessions at Oulton Park, and four of them detained in hospital.

Dr J. C. Bragg, 27, was admitted to hospital with serious burns after the sports car he was driving at Mallory Park, Leicestershire, somersaulted and caught fire, trapping him underneath.

Two other riders were hurt at a meeting at Brand's Hatch, Kent.—Reuter.

ZOO CATCHES FIRE

**She saves lives
of snakes and
other animals**

London, May 22.

A pretty 21-year-old zoo keeper saved the lives of scores of animals including a python and a boa constrictor in a zoo fire in Exmouth early today.

The zoo, which opened its summer season only a few days ago, contained a large exhibit of reptiles and birds and only the efforts of Miss Margaret Hadwick, saved many of them from suffocation.

Miss Hadwick, who sleeps on the premises, was awakened by the police who spotted the fire in the front of the building.

After letting the officers in, she plunged back into the smoke-filled building, freeing several animals and placing the two dangerous snakes into sacks before carrying them to safety.

Officials estimated that about £300 worth of birds and reptiles lost their lives in the fire. The zoo's director said later that, but for the efforts of Miss Hadwick, the loss would have been much heavier.—China Mail Special.

**CAMBODIA
BACKS
BRITISH
PLAN FOR
LAOS**

Geneva, May 22.

Neutral Cambodia today fully backed Britain's four-point plan for warring Laos and Western appeals for effective international supervision of the Indo-China kingdom's frontiers.

General Nhieu Thouloung, the Cambodian Foreign Minister, told the 14-nation conference on Laos that the plan put by the Earl of Home, Foreign Secretary, last Tuesday was "extremely reasonable and deserves to be taken as a basis of discussion."

The Cambodian speech was immediately praised by Western spokesmen as "constructive and impressive."

DECLARATION

Lord Home had called for a Lao declaration of neutrality, a conference declaration respecting Laotian unity, independence and neutrality; international machinery for controlling arms supplies to Laos; and machinery for giving Laos international economic aid.

General Thouloung proposed the setting up of posts around the frontiers of Laos manned night and day by teams of international control commissioners to block clandestine infiltration into the country and bar the entry of military material.

He urged delegates to find a compromise between American and Soviet views on how to supervise the peace in Laos.

General Thouloung said the Soviet delegation was justified in objecting to a control organization with a "supernatural character." But Russia's proposals for control machinery with built-in vetoes "went too far in the other direction."

The Burmese Foreign Minister, Mr Sao Hukun Htoo, told the conference that if an independent and neutral Laos emerged there would come into being a "continuous stretch of non-aligned states from India in the west to Laos and Cambodia in the east, a de facto neutral zone."

"This is a development which we in Burma would warmly welcome, and which we believe would contribute to the peace of Asia and the world," he said.—Reuter.

**9 missing, 6 injured
in U.S. explosion**

**Cumberland, Md., May 22.
Nine persons were missing and six other workers injured to
day in an explosion and fire at a U.S. Navy facility which
makes fuel for missiles.**

The number of missing and injured were announced 9½ hours after the explosion by the Hercules Powder Co., operator of the Allegany Ballistic Laboratory for the U.S. Government and the Bureau of Naval Weapons.

They said families of the missing are being notified and no identities would be announced until all the next of kin had been informed.

Black hole

An extensive search of the area, which is in West Virginia about seven miles from Cumberland, was being conducted for the missing persons.

Fire followed the explosion hampered the search.

The explosion took place in a plant for making solid

**JACQUES, AGE 5, DIES FOR
CHERRIES HE NEVER ATE**

Toulouse, May 22. It was the first cherries five-year-old Jacques Michau had ever seen, and he eyed them longingly.

"I'll pick you a handful," said his father, Roger Michau.

**BOATING — IN
THEIR CAR**

Sydney, May 22. A family of five on a picnic outing unintentionally went boating in their car on the Mall River, 150 miles north of Sydney yesterday.

Mr M. Croft, of Newcastle, on the northern New South Wales coast, was turning on to a wharf when his car plunged into 30 feet of water and floated 50 yards upstream.

The boots include one of the late Sir Alfred Munnings, former President of Britain's Royal Academy, written in 1927. The year Sir Alfred gave a successful one-man show in London. He was knighted in 1941.—China Mail Special.

This report contradicted previous rumours that the five officers met their death during the launching of a cosmic rocket.

The victims were Generals Kilpatrick, Everard, Goffe and Morozov and Colonel

Khikhevski.

It was now reported that they were returning in a helicopter from an inspection of the Odessa region when one of the rotary blades broke off.

Rescue workers arrived at the scene of the crash too late; the wreckage was in flames.—AFP.

Wall Street stocks turn lower

New York, May 22.

Stocks turned lower in the final hour today with increased activity in sales.

Interest in the blue chips centred on Du Pont down around $7\frac{1}{2}$ points and General Motors off about two following a Supreme Court decision ordering the giant chemical company to divest itself of its 63-million share interest in GM.

Other leading chemicals and motors were mixed, but losses ran past a point in key steel issues despite a further increase in production last week.

Metal stocks were fractionally irregular although Alcoa managed to show about a two point gain. Most drugs were lower, featuring a loss of more than three points in American Home Products.

Today's volume: 4,070,000 shares. Of a total 1,200 shares traded, 464 were higher and 624 lower. American Exchange volume was 2,300,000 shares.

Bonds volume amounted to 6,370,000.

Dow-Jones closing averages:

30 Industrials—702.44.

who have a wide range of antibiotics and pharmaceutical specialities to offer you.

Chicago grain

Chicago, May 22. July soybeans plunged the daily 10-cent limit in a sharply lower grain market today on the Chicago Board of Trade.

Selling was heavy in most grains. Longs liquidated holdings in corn and soybeans, while wheat and rye followed the general market trend.

Soybean meal and oil futures also declined.

A lower soybean crush figure for April as compared with a year ago provided no surprise. Selling increased, however, on reports of large stocks at processing plants.

In soybeans, the July delivery was down below the \$3 mark for the first time since April 3. Prices were down about 40 cents from the season's high.

No export sales were reported as most European countries observed holidays.

Wheat closing range: off $\frac{1}{2}$ to $\frac{1}{4}$ cents.

Soybeans closing range: off 3 to 10 cents.—UPI.

NEW YORK COTTON MARKET

New York, May 22. Cotton futures holding to the recent trading pattern, drifted listlessly over narrow limits in dull dealings today.

At the close the list ruled off four to up seven points. The market opened off five to up seven points. New Orleans also closed off four to up seven points.

Evening-up operations between trade and commission houses accounted for most of the activity. New market interest continued to be held in abeyance pending some new leading incentives.

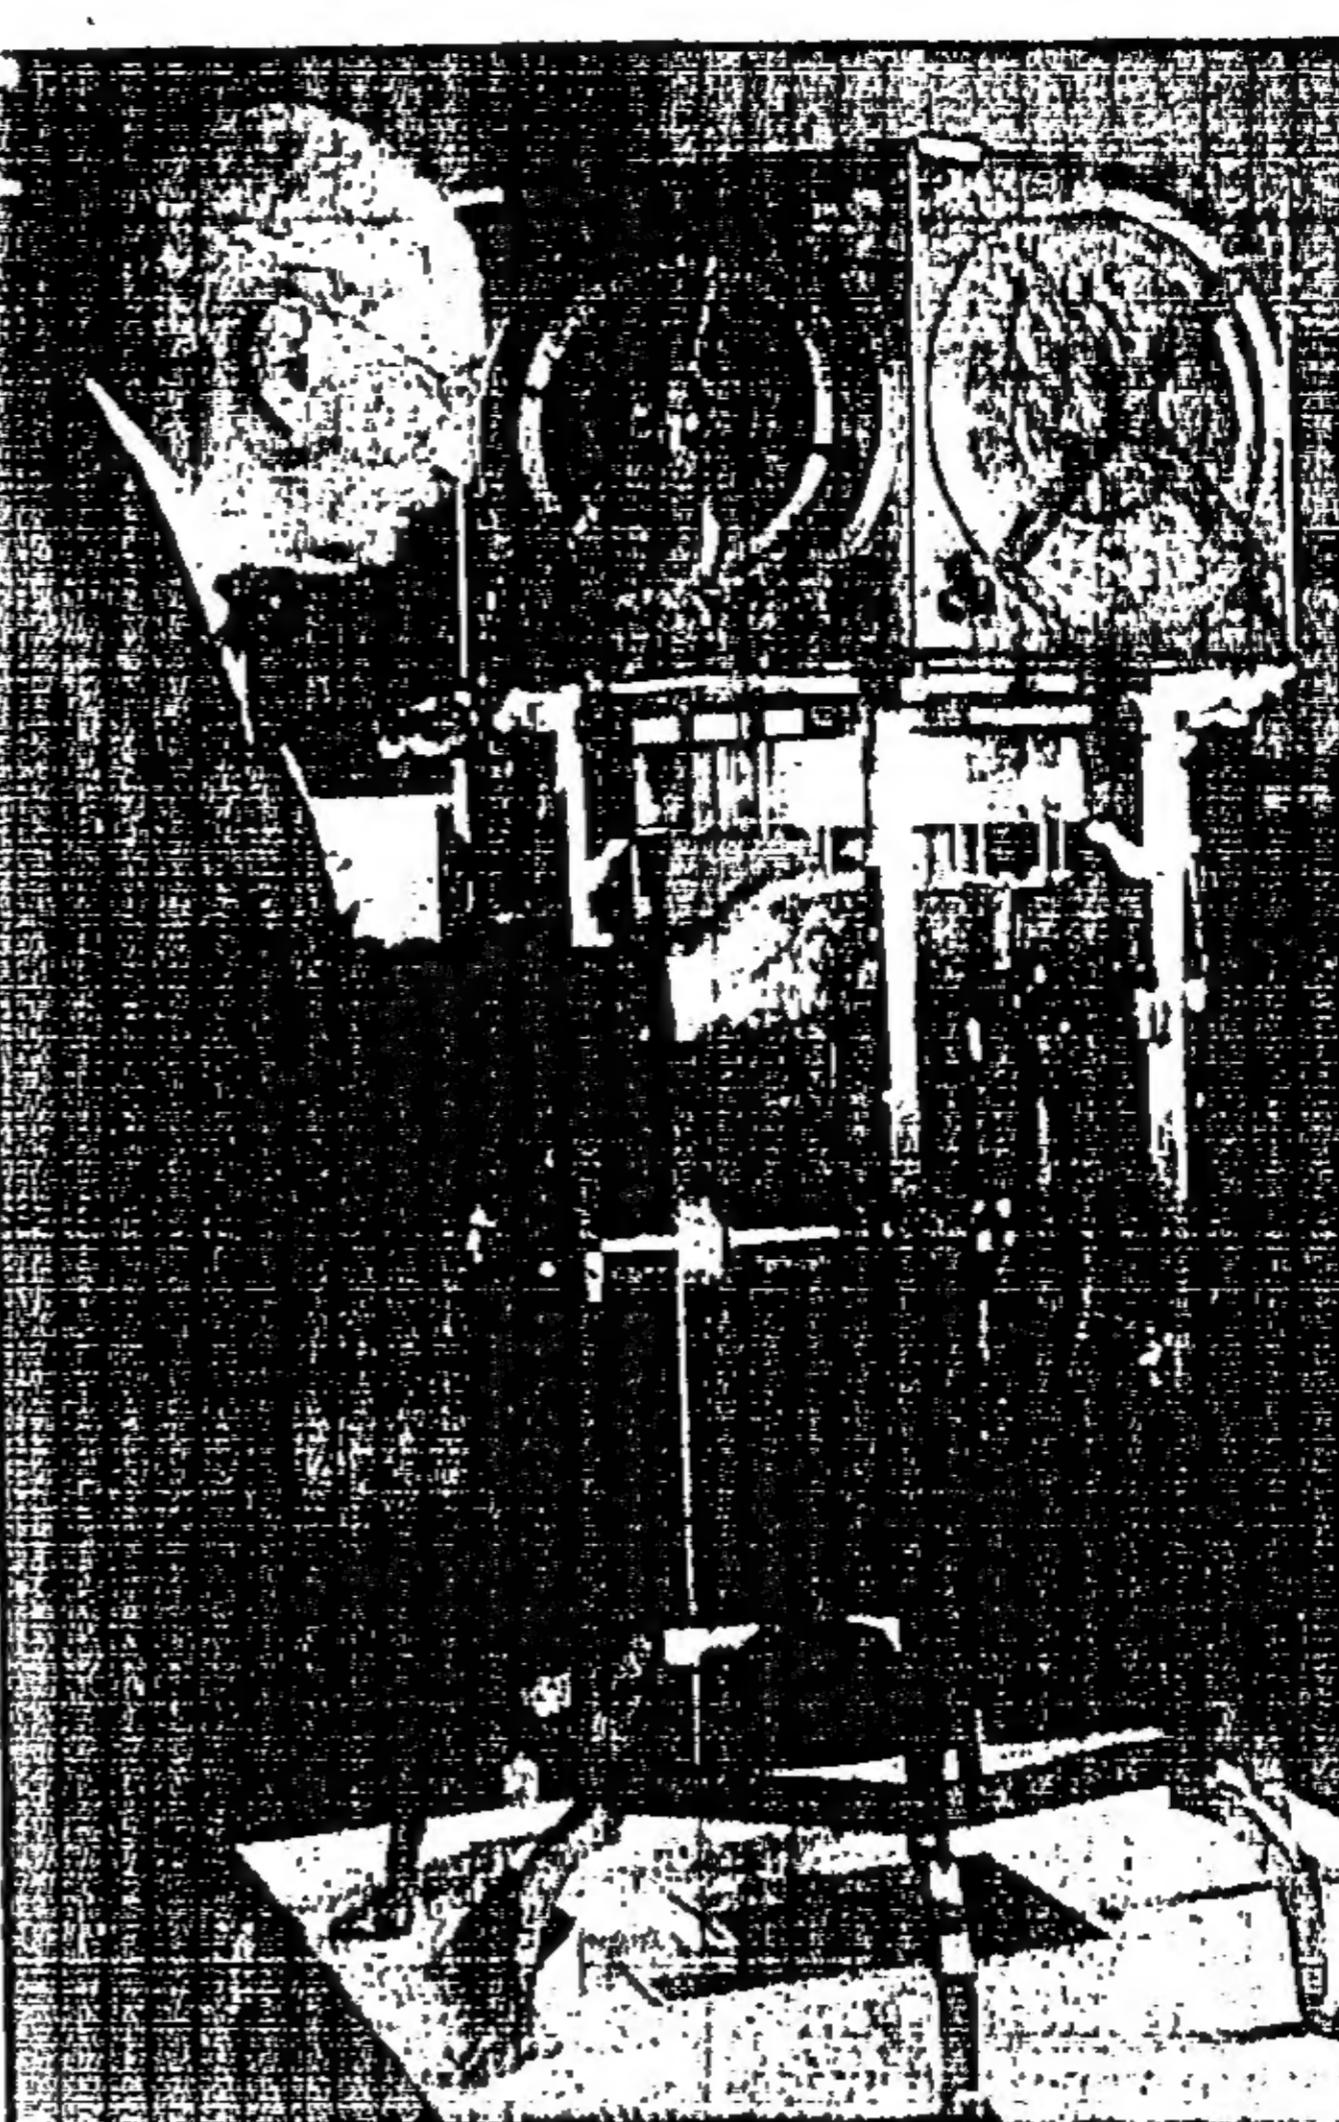

Dullness in the textile market and the slackening demand for spot cotton from domestic textile mills and exporters curbed new market interest.

Outside traders continued to be more interested in the stock market action and fluctuations in soybeans and some other commodities.

Private crop reports said cotton in the Rio Grande valley has been making good progress. El Paso also reported favourable conditions with temperatures uniformly high. However, strong winds rapidly dried top soil in Oklahoma, California and Arizona reported "reasonable progress" with the arrival of normal temperatures.

The certificated stock rose to a new high today at 103,098 bales plus 2,873 bales awaiting inspection.—UPI.

Clock that tells all

The first full astronomical clock to be produced in Britain for 250 years is on show at the Science Museum, South Kensington, London, until June 25. It is an exact reproduction of a clock first designed and made nearly 600 years ago by the Italian John Dondi. His clock, which was destroyed during the Peninsular wars in Spain, showed, besides mean or clock time, the sidereal or star time and the motions of the sun, the moon and of the five then known planets, all driven from an ordinary weight-driven clock movement. It also recorded the hour, the minute, the length of daylight for every day of the month, the day of the month and the times of the equinoxes and solstices of the sun. It also included a perpetual mechanical calendar for Easter, an achievement not paralleled for 500 years. Although Dondi's clock was destroyed, fortunately he left a full description in Latin of how he made the clock, with working drawings. This was translated by the late G. H. Baily in the 1930's, and now the horological author H. Alan Lloyd has completed Dondi's work, and had a reconstruction of Dondi's clock made, by Thwaites and Reed Ltd. Picture shows: Mr. Alan Lloyd with the reproduction of Dondi's astronomical clock.

To bring captives before courts if 'U.S. insults' persist CASTRO MAY CANCEL OFFER

Another raid by Pakistan Air Force

Peshawar, May 22. The Pakistan Air Force today carried out a second aerial attack within 24 hours on a village in the turbulent north west frontier region where Pakistan claims raiding Afghan troops are hiding.

An official spokesman charged that Afghan agent Badshah Gul, supported by Afghan government soldiers, is operating from the village of Bagdandil in the Bajaur region.

He said today's action was taken "to destroy enemy positions which have been attacking Pakistani posts." He described the action as "successful."

WARNED EARLIER

The villagers had been warned earlier of the attack by dropping leaflets.

The spokesman declared there was also no ammunition dump in the Afghan hideout.

Afghanistan claims the people of the area, known as Pash-tounistan, have never accepted Pakistani rule and the area should be given to Afghanistan.—AP.

UN group to examine Angola issue

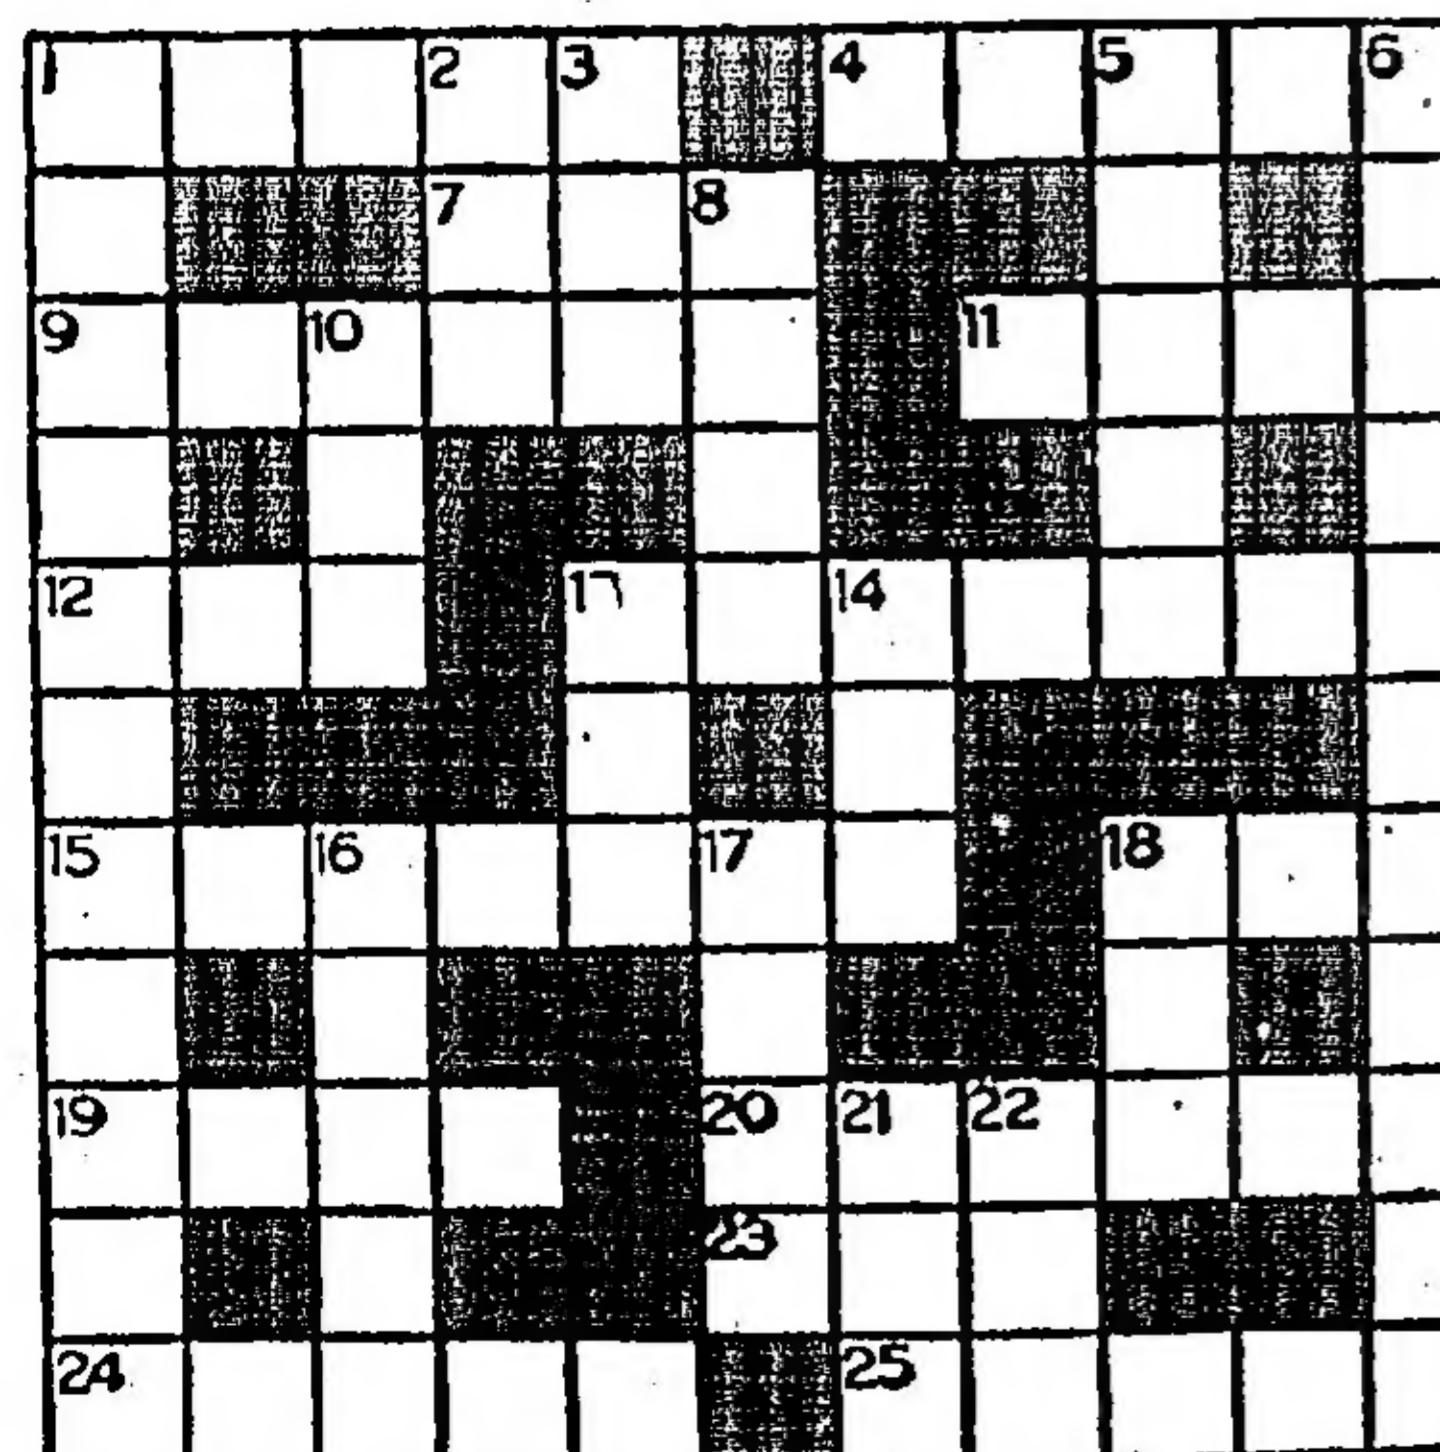

United Nations, May 22. Mr Frederick Boland, President of the General Assembly, has nominated representatives of Bolivia, Dahomey, Malaya, Finland and Sudan to a sub-committee to examine the Angola situation, it was announced today.

It was expected the members of the sub-committee would be nominated by their respective governments shortly.

The General Assembly has authorized the sub-committee to "examine the statements made before the assembly concerning Angola, to receive further statements, and to conduct such inquiries as it may deem necessary."

Portugal claims that Angola is an integral part of her territory and that the U.N. has no competence to discuss the issue.—Reuter.

Considering a prisoners for prisoners swap

Key West, Fla., May 22. Havana Radio reported today that Dr Fidel Castro, is prepared to exchange Cuban political prisoners for political prisoners in the United States and Central America.

The same broadcast, monitored here, said Dr Castro had threatened to call off the "tractors-for-prisoners" negotiations if the U.S. persists in referring to it as an "exchange."

"This is an indemnification and not an exchange," Dr Castro was quoted as saying. The broadcast later made it clear that Dr Castro referred to prisoners taken in last month's abortive invasion.

"Political prisoners" in the US and elsewhere whom he would want in exchange include Pedro Albizu Campos, jailed Puerto Rican nationalist leader, Francisco ("The Hook") Molina, awaiting sentence for shooting a nine-year-old Venezuelan girl in a cafe brawl during Dr Castro's visit to the UN last September, and other prisoners in Guatemala, Nicaragua, and Spain.

Negotiate

The Cuban broadcast also warned that the captured 1,200 invaders would be brought before revolutionary tribunals if the United States "persisted in its insults" concerning the prisoners-for-bulldozers proposal.

Castro was quoted as saying the United States considered the trade offer "cynical" while it was the United States that had been "cynical and immoral" in ordering the invasion of Cuba.

When the ten Cubans released to negotiate the men-tractors deal arrived in Washington today, accompanied by Dr Jose Cardona, president of the Cuban Revolutionary Council, they went immediately to meet the committee headed by Mrs Eleanor Roosevelt, which is raising funds for the exchange.

A spokesman for the U.S. State Department, which has promised sympathetic consideration to applications for shipment of the tractors if funds can be raised, said the Department awaits a further report from the fund-raising group.

Made over all Morris shares to foundation

London, May 22. Lord Nuffield, British motor magnate, has made over all his shares in Morris Garages Limited to the Nuffield Foundation he set up in 1943, it was announced.

The gift, officially believed to be worth more than £300,000, is to be known as the Viscount Nuffield Auxiliary Fund.

It will help the blind, deaf-mutes and children's homes. Other charities may be included later.

The Nuffield Foundation, for the promotion of health, education and social work within the Commonwealth, had an initial capital of £10,000,000.—China Mail Special.

Suspected Soviet spy arrested in Thailand, to be charged

Bangkok, May 22. Bangkok police, who arrested a Soviet citizen, told he would be charged with subversive activities in violation of Thailand's anti-Communist law.

Deputy Police Director General Krasen Stratford today identified the Russian as Thomas Bulgakoff, a representative of Russia's "Silver Star Motion Picture Company." Krasen said four other Russians were picked up for questioning but later released.

Police authorities declined to discuss Bulgakoff's case in detail except to indicate it chiefly propaganda work. They said a search of his home yielded Communist documents and movies not permitted in this staunchly pro-Western country. They did not elaborate.

'MAKES US HANG OUR HEADS IN SHAME'

Kennedy on coming talks with Khrushchev

Washington, May 22. President Kennedy today expressed hope that his conference with Soviet Premier Nikita S. Khrushchev next month will lead to a "better understanding" between the United States and Russia.

Mr Kennedy stated that hope to a group of Soviet editors with whom he chatted at the White House.

Andrew T. Hatchet, Assistant White House Secretary, told reporters that Mr Kennedy informed the Russian journalists he is "hopefully looking forward" to the face-to-face meeting with Mr Khrushchev in Vienna on June 3-4.

"From this meeting," Hatchet quoted Kennedy as adding, "there is a possibility of attaining a better understanding between myself and chairman Khrushchev and also a better understanding between the two countries."

'LOT TO BE DONE'

"We have come through difficult times and this in itself stresses the necessity of closer communications between leaders of great powers and between their peoples."

Mr Kennedy further told the visiting editors, Hatchet said, that "in this area there is a lot to be done yet."

Twelve Russian editors, nearing the end of a tour of the country, called on Mr Kennedy. Two Washington reporters for *Tass* joined them, but no US newsmen were admitted.—AP.

Aero-engine exports doing well

London, May 22. British aero-engine exports are currently running at £250,000 worth a day, the Society of British Aircraft Constructors said here.

They exceeded £8,000,000 for the first time in March. The previous record for one month was £5,500,000.

The Society added: "It seems likely that within the next year or two, the annual value of Britain's aero-engine exports will top £100,000,000."

Last year aero-engines fetched a record £73,500,000.—China Mail Special.

Russian nuclear submarines

Johannesburg, May 22. The pro-government newspaper *Die Volksblatt* said here today that Russian fishing vessels off the coast of southwest Africa have been laying radioactive mines for nuclear submarines.

Its correspondent at Walvis Bay, southwest Africa, said the markers would enable the submarines to fire missiles with deadly accuracy at any target without surfacing.

Similar markers were laid around the coast of Canada in 1958, he said.—Reuter.

Alabama racial riots flayed in U.S. Senate

Washington, May 22. The racial violence in Alabama "makes us as a nation hang our heads in shame," Senator Mike Mansfield, the Democratic leader, told the United States Senate today.

The Montana Senator said: "I blame the hoodlums who perpetrated the outrages. I blame the local law officers, their supervisors and the officials of the state of Alabama."

He condemned the Kennedy Administration for intervening in what he called "a delicate and dangerous situation."

"If we cannot keep our own house in order, how are we going to lead our allies and our friends?" He said. "How are we going to lead the free world in its struggle for survival?"

FAUBUS ENTERS

Meanwhile Arkansas Governor Orval Faubus, whose defiance of court-ordered integration at Little Rock schools brought Federal paratroopers into his State capital in 1957, has entered the Alabama situation.

He sent a telegram to the U.S. Attorney-General, Mr Robert Kennedy, saying it appeared "your office not only encouraged, but perhaps assisted, in instigating the group of agitators and provocateurs mislabeled the 'Freedom Riders' to go into Alabama."

He also sent a telegram of sympathy to Governor John Patterson of Alabama, saying the situation there "was brought about by outside agitators, as was the case in Little Rock in 1957."

Meanwhile, the US Federal Government withdrew its marshals from the streets of tense Montgomery today but kept on the edge of the city ready for action.

The Justice Department announced also the first Federal Bureau of Investigation arrests in connection with violence against the "Freedom Riders."

Four men were taken into custody at Anniston, changes in connection with the burning of a "Freedom Riders" bus several days before the mob outbreak in Montgomery.

Both of these developments came shortly after the Alabama Congressional delegation had

asked withdrawal of all US marshals from the State. Others in Congress praised dispatch of the Federal officers.

He said, because the Alabama National Guard appeared to have the situation in the city under control.

At the same time, the Department announced the withdrawal of the marshals to Maxwell Air Force Base, minutes away from the centre of Montgomery.

The withdrawal was made, a spokesman for the Department said.

DU PONT MUST GIVE UP GM SHARES

—U.S. Supreme Court

Washington, May 22. The U.S. Supreme Court ruled today by four votes to three that the Du Pont Company must give up 63 million shares in General Motors valued at US\$2,500 million.

The government has long been fighting, under the antitrust laws, to force Du Pont to give up its holding in General Motors—about 23 percent of the outstanding General Motors stocks.

INSISTED

The court was ruling on a Justice Department appeal from a decision by District Judge Walter LaBuy in Chicago, who found that Du Pont's surrender of its voting power would be sufficient to meet the anti-trust laws.

The appeal insisted that Du Pont should be required to dispose of its shares.

Elizabeth Taylor amazed kidnap plotters still at large

Las Vegas, May 22. Actress Elizabeth Taylor and her singer-husband, Eddie Fisher, said today they are amazed that three men who plotted to kidnap the actress' children are still free.

Miss Taylor said she had been assured, by authorities that the youngsters are in no danger. She was disgruntled despite assurances.

"But how can the public be sure that their children are safe while these kind of people are still at large?" she asked. "If they would catch a plot like this once, what is to keep them from doing it again a year from now or even tomorrow?"

The two-year-old kidnap plot came to light on Saturday when one of the conspirators came forth and confessed his part in the scheme. Sheriff Ralph Lamb said three Czechoslovakian waiters were involved.

No charges were pressed against the confessor. Lamb said the plan was born two years ago. At that time Fisher had come here to divorce actress Debbie Reynolds. Miss Taylor also came here and rented a ranch home.

\$50,000 RANSOM

The children were by Miss Taylor's marriage to Mike Todd and Michael Wilding.

The three waiters planned to kidnap the children for \$50,000 ransom, but the plot fell through when they could not find someone else they could trust to take care of the children," Lamb said.

According to the Sheriff's Office, two of the would-be abductors live in Las Vegas, Nevada, and one lives in Oakland, Calif.

"It's hard to understand how three men who planned such a thing are walking around free," said Fisher.

Detective Gerald Brown said:

"No overt act was committed and there was no positive evidence of a conspiracy already two years old."

Billy Graham on Negro question

Southampton, May 22. Dr Billy Graham, the American evangelist, questioned on his arrival here tonight about Alabama's racial integration troubles, was asked if he would allow his 16-year-old daughter Virginia, to marry a Negro.

"I would let her make her own choice," he told a press conference. "But I would say that it would be very unwise in the American situation, I would advise her of that would be any responsible Negro leader."

Denying that he had "that kind of racial prejudice," Dr Graham had just arrived aboard the liner Queen Mary to begin his third religious crusade in Britain during which he hopes to convert 20,000 people.—Reuter.

Explosion cuts cable

Algiers, May 22. Transmissions by the French radio station here stopped for about 10 minutes today when a bomb cut a cable under a bridge in the suburbs of Algiers.

The explosion also cut telephone lines and damaged buildings.

The main radio installations were undamaged and broadcasts were resumed on an emergency circuit.—Reuter.

Bomb buried

Paris, May 22. A plastic bomb damaged the house of a local leader of the pro-Gaulle Union for a New Republic (U.N.R.) in Perigueux last night, but caused no casualties.

The bomb was hurled into the garden of Alexandre Zinguerich, a barrister and chairman of the local U.N.R. committee. All the windows of the house were smashed.—AFP.

EARTHQUAKES

Pasadena, May 22. Two powerful earthquakes, 5,000 miles distant in an intermediate direction, were reported today at the California Institute of Technology. They were timed at 1756 GMT and 1744 GMT.

"We hope the present Congress will move promptly to protect the stockholders of other corporations who may find themselves similarly situated in the future,"—Reuter.

THEY'RE YELLING FOR HIS CREWCUT SCALP

STEWART LE UDALL, 41-year-old member of President Kennedy's Cabinet, is in such hot water today that Republicans are yelling for his crewcut scalp.

They are calling him the Democrats' U-2 incident — a reminder of the Eisenhower embarrassment over the U-2 plane shot down while spying on Russia.

In the space of two weeks Secretary of the Interior Udall has caused Kennedy two embarrassments.

LATEST BOOR: He told a friend in the oil business, Jack Evans, that he hoped he would bring "a few of his friends" to a dinner being held in Washington on May 27 to help wipe out the Democrats' campaign deficit of more than \$2,000,000 dollars (£714,000).

An innocent-sounding hope—but it became a political bombshell when Evans wrote to 56 oilmen and asked them to buy the Democrats' campaign deficit of 100-dollar (£35) tickets for the dinner.

Udall, you see, as Interior Secretary, supervises the oil industry and so immediately

claims the new W.A.C. wooling brochure: "There is no figure more feminine, more dashing, more trim than that of a young woman in a tailored, smartly styled ensemble of the Women's Army Corps."

Posters proclaim: "W.A.C.s will be Girls."

ADVERTISEMENT in the student newspaper of the University of North Carolina: "For sale: one 1949 black sedan. Extras include no clutch, dead battery, and five parking tickets."

TWENTY-NINE New York building inspectors have been explaining to a grand jury just how they have managed to become so well-off.

They were called on for their explanations after a two-year Rackets Bureau probe. For the

Peter Evans

there were horrified cries of "blackjacking." The implication is that the oilmen would expect some Government favours in return.

BOOB NO. 1: Only recently Udall stirred up a storm among Republicans by saying on television that the Eisenhower Administration "started" the Cuban invasion and handed it over to Kennedy.

The President finally took the heat off Udall by publicly taking full responsibility for the Cuban debacle.

Six inspectors said they bet on the horses—and NEVER LOST.

NO WONDER President Kennedy is worried about blocking that Swiss tax escape route.

It was revealed that over 200 American-owned companies were set up in Switzerland in the past year to avoid US taxes.

Washington (unofficial) comment: "They will soon be calling Zurich Dodge City."

JAMES MASON'S wife, Pamela, one of Hollywood's most outspoken women, may soon be parlaying her acid wit on a nightly TV show.

"They want to make me a sort of female Jack Paar," she says. "They're looking for some kind of nut to keep other nuts awake at night."

CHECKED for talking in class, a 14-year-old Los Angeles school-girl stabbed teacher Robert Collier three times in the back.

"Nobody tells me to shut up," she said. Collier's condition: critical.

QUOTE — by actress Bette Davis whose fourth marriage recently broke up: "I never marry again. It's too bad it won't work, because I like men. I just can't stay married to them."

SIGN in a Madison Avenue window: Peering aids—monocles.

SHE RAN into the fire station shouting "Fire, fire." But no one was there.

So housewife Gini Van Fleet jumped into the fire engine herself and raced it two miles to a blazing lakeside cabin in Kansas City.

Too late. When she arrived the cabin had burned down.

—(London Express Service).

Says Ann: "I am deeply shocked at her action. I have always supported her generously."

THIS is the army, Miss Jones. The big recruiting drive just started for the US Women's Army Corps puts the emphasis on sex appeal.

Duke, bride to stay
at Balmoral

London, May 22.
The Duke of Kent, 25-year-old cousin of Queen Elizabeth, and his fiancee, Miss Katherine Worsley, are to spend the first part of their honeymoon on the Queen's Balmoral Estate in Scotland, it was learned here.

The Duke and Miss Worsley are to be married in historic York Minster on June 8. They will travel to Scotland after the wedding reception at Miss Worsley's home, Hovingham Hall, 20 miles from York, it was announced at Kensington Palace, home of the Duke's mother, the Duchess of Kent.

AT BIRKHILL

At Balmoral they will stay at Birkhall, only a few miles from Birkrigg Castle.

Balmoral is the property of the Queen, but the house at Birkhall, normally occupied by Queen Mother Elizabeth who has left it to the Duke for this part of his honeymoon.

Birkhill stands in a secluded part of the Balmoral Estate. It has been a Royal residence for over 200 years.

Prince Albert, husband of Queen Victoria, bought it soon after the Royal Family acquired their Bessie home.

BUILT 1715

The Queen and the Duke of Edinburgh spent part of their honeymoon there in 1947.

The original three-storey house was built in 1715. A new wing was added in 1957.

King George Sixth and the Queen Mother as Duke and Duchess of York, spent many of their autumn holidays there.

For many years in the early part of its Royal ownership the house was the Bessie home of the then Prince of Wales, later King Edward Seventh.

WAR HEROINE

It has been described as the birthplace of the Royal Army Medical Corps.

Flora Nightingale, the British nurse whose work in the Crimean War made her a national heroine, spent some weeks resting there after her return from the Crimea in 1856.

She was visited frequently by Queen Victoria, and between them they worked out a scheme for an Army Medical Service.—China Mail Special.

Musical comedy
pays better
than opera

London, May 22.
Australian singer June Bronhill will return to Australia in July to sing the lead in the Rodgers and Hammerstein musical, "The Sound of Music," theatrical circles said today.

Miss Bronhill will leave the operatic stage temporarily when her contract with Sadler's Wells ends in the middle of July, according to the reports.

They quoted her as saying she plans only a temporary absence from opera, and wants to use her musical comedy salary, far higher than opera pays, to return to Europe for six or nine months to study languages and operatic roles she particularly wants to sing.—UPI.

ATHENS' MAYOR WRITES TO MACMILLAN

Pleads for Elgin Marbles

Athens, May 22.
The Mayor of Athens, Mr. Angelos Tsoukalas, has sent a cable to Mr. Harold Macmillan pleading for the return of the Elgin Marbles to Greece.

He sent similar messages to the Lord Chancellor of the House of Lords, the Speaker of the House of Commons and the Lord Mayor of London.

The Mayor's cables followed an Athens town council decision to request Britain to return the

Dr Fisher Jr
marries with
father's help

London, May 22.
Dr Geoffrey Fisher, Archbishop of Canterbury, officiated at the wedding of one of his six sons.

Dr Fisher, 74, retires on May 31.

His doctor son, Dr Geoffrey Fisher, 34, married 24-year-old dentist's receptionist Jill Audrey Cooper in the private chapel at Lambeth Palace, the Archbishop's London residence. There were about 80 guests.

The Archbishop has previously married two other sons—China Mail Special.

Orders
security
review

London, May 22.
The Secretary for War, Mr Julian Amery, has ordered a further departmental review of security arrangements at the Air Ministry and in the Royal Air Force, he told the House of Commons.

A member asked for an assurance that there had been a security check on the past history of all personnel having access to secret information and a recent investigation into unauthorised persons having access to secret information and equipment.

FURTHER REVIEW

Mr. Amery said he felt these points were covered by the further review he had asked for.

A review of Admiralty security arrangements was ordered after the discovery of the Londonderry spy ring working on behalf of "a potential enemy."

The Government also announced that it had ordered a review of the whole of Britain's security arrangements. This followed the sentencing of George Blake, a Foreign Office employee, to 42 years' imprisonment for spying for Russia.—China Mail Special.

Still going on
with his
1-man campaign

London, May 22.
A Labour Member of Parliament who has been conducting a one-man campaign against the expense of the British Royal Family has now queried the employment of British soldiers in the Royal Household.

Mr. William Hamilton was told by the War Secretary Mr. John Profumo, in the House of Commons that the 11 soldiers employed in the Royal Household were all regular soldiers of the Household Brigade.

They had been so employed for persons varying from between one to 30 years and were paid by the War Office. Mr. Profumo said.

ALL VOLUNTEERS

Mr. Hamilton asked him: "Is it not ludicrous that at a time when there are moons on all sides of the House about the shortage of recruits that this kind of men should not be recruited through the normal channels of the Labour Exchange?"

Mr. Profumo said there was "nothing ludicrous" about the matter.

"They are all volunteers," he added. "Eight are employed in clerical jobs and three as personal orderlies."

PUBLIC CONCERN

Mr. Hamilton said: "There was a good deal of public concern about a fortnight ago when a certain request was made to a certain regiment for a servant

to More arriving
in UK from
West Indies

London, May 22.
During the first four months of this year there were 18,550 immigrants into the United Kingdom from the West Indies compared with 9,800 during the corresponding period of 1960, Mr. R. A. Butler, the Home Secretary announced.

Mr. Butler, who was answering a question in the House of Commons, later published a table showing the net inflow into the UK of immigrants from the West Indies, India, Pakistan, and Cyprus for the first four months of this year compared with a similar period in 1960.

4 MONTHS

This showed that during the first four months of 1960 the returns were: West Indies 8,000; Cyprus 500; India 950; Pakistan, a net outward movement of 400. For the corresponding period of 1961 the figures were: West Indies 18,550; India 4,050; Pakistan 4,000; Cyprus 1,500.—China Mail Special.

Bachelors with no time for girls...

They're all tied up—

on the playing

fields of England

If it's accepted that all handsome men are slightly sun-burned then the Australian cricket team will be accelerating feminine pulses from Lords to Leads this summer.

But I doubt if the romance will be reciprocal because out of these 17 strong men and true all but four are married with thoughts of home rather than abroad.

Which would seem to make manager Sidney Webb's cautionary 8 a.m. curfew more of a joke. Even Richie Benaud, the captain, admits this is "the quietest bunch of cricketers I've ever been with."

I met the team over steaks and milk—the pins, I was told, only comes out at night—and learned that the average age is 27 and eight months, that each man is paid £1,200 Australian pounds plus all expenses for the trip, and that wives are banned.

I asked Mr Webb why, as a six-month parting would appear rather a lot to ask of a marriage.

TROUBLE

"Well, wives always create trouble," said this stubby little man with a potato-peeler voice. "They either row between themselves or they cause upsets within the team."

"This way the boys stick together and they're all good friends. Of course, if a wife comes over under her own steam there's nothing we can do." Colin McDonald's muse is here, as a matter of fact, but she's not allowed to travel with us or to stay in the same hotel.

"And anyway very few of our wives are interested in cricket," added Benaud dolefully. "So as we're playing six days a week with only Sundays for golf or resting up in bed they wouldn't see much of us if they did come."

Benaud, the tall, lean veteran of 50 Tests, is one of the most impressive lookers in the team. He has Siamese-cat eyes, unusually graceful hands, and moves as if he's conserving energy for something better.

JOBS

A right-hand spin bowler, he's played cricket most of the time this past year.

"I've only been in the office on a handful of occasions in recent months," he told me. "Our jobs are kept open for us while we're away, but very few of us still draw a salary... after all, an employer can't be expected to carry a fellow all his cricket career—it may be 15 years."

"A gambler? You may be right—I have known players lose their seniority because of these tours."

Frank Misson, a 22-year-old bowler known as a right-hand fast bowler, is also curiously distinctive.

Perhaps because with his straw hair and pale skin flushed pink on the s.s. Himalaya's sun-deck he looks so English.

DIET

Lanky and very girl-conscious, it turns out that when he's not working at a Sydney paper mill he's a health fanatic. The others think he's a bit of a crank with his year-round diet of fruit, nuts, honey, glucose, and milk... "calls for big jugs of it he does," they said.

Aged 31, he's a journalist with the Sydney Morning Herald, and though married with two children still thinks the tour is "fab."

What of the remaining eligible?

Well Bill Lawry and Ian Botham have the reputation of being the quietest and most reserved players in the team.

Lawry, a 24-year-old plumber from Melbourne, is known as a "stubborn left-hand opening batsman and a pigeon-fancier."

Apart from scoring 840 runs in first-class cricket last season, one of his birds won the championship race from Hobart to Melbourne.

A small man with a cheeky cocky face, he carries the unlikely nickname "Phantom."

COMICS

This is commonly believed to come from his favourite and fastest racing pigeon, "Phantom's Pride," but in fact started many years ago when, as a youth, he was originally selected to play in first-class cricket.

"He turned up at the train," recalls one of his mates, "with a whole wad of smiles under his arm. They were all about the 'Phantom' and he's been called that ever since."

Quietly, perhaps the biggest man in this hefty quota, is even more taciturn than Lawry.

A 27-year-old car-tester from Melbourne, he plays for the South Melbourne Cricket Club, which has so far produced five Australian Test captains—the record—and lives with his parents about 40 miles out of town.

It's acknowledged as an "all-round, good guy—particularly when it comes to beer-drinking and amorous adventures."

South Melbourne Cricket Club, which has so far produced five Australian Test captains—the record—and lives with his parents about 40 miles out of town.

It's acknowledged as an "all-round, good guy—particularly when it comes to beer-drinking and amorous adventures."

It's a formidable task for any woman to produce a child and a novel a year... particularly when the novel has to be historically accurate.

But somehow Evelyn Anthony manages to cope. Her seventh book, "Charles the King" (she was writing long before her marriage in 1955), will be published this summer round about the same time as her fourth child is born.

And, like the rest, its world sales will probably total millions.

"It's something I do in my spare time," explained this young, freckled, red-head when we talked about her £10,000-a-year career. "It will always come second to my family but I find it a great release from everyday worries."

"You see, I think the ordinary housewife has a very dull and a very hard life so when she settles down with a book she wants something miles away from the kitchen sink and where a man will read James Bond she'll read something historical.

The next eccentric on Miss Anthony's writing list is Cleopatra.

(London Express Service).

A £10,000 job...

HUSKY

The fourth bachelor is a husky, auburn-haired P.T. instructor, Graham McKenzie, known as the "Baby" — who must become the pin-up of the Junior League. Unfortunately, at 19, he's out of mine.

A native of Perth, there is something about him that's endearing. In his family, for both his father and his uncle

captained Western Australia.

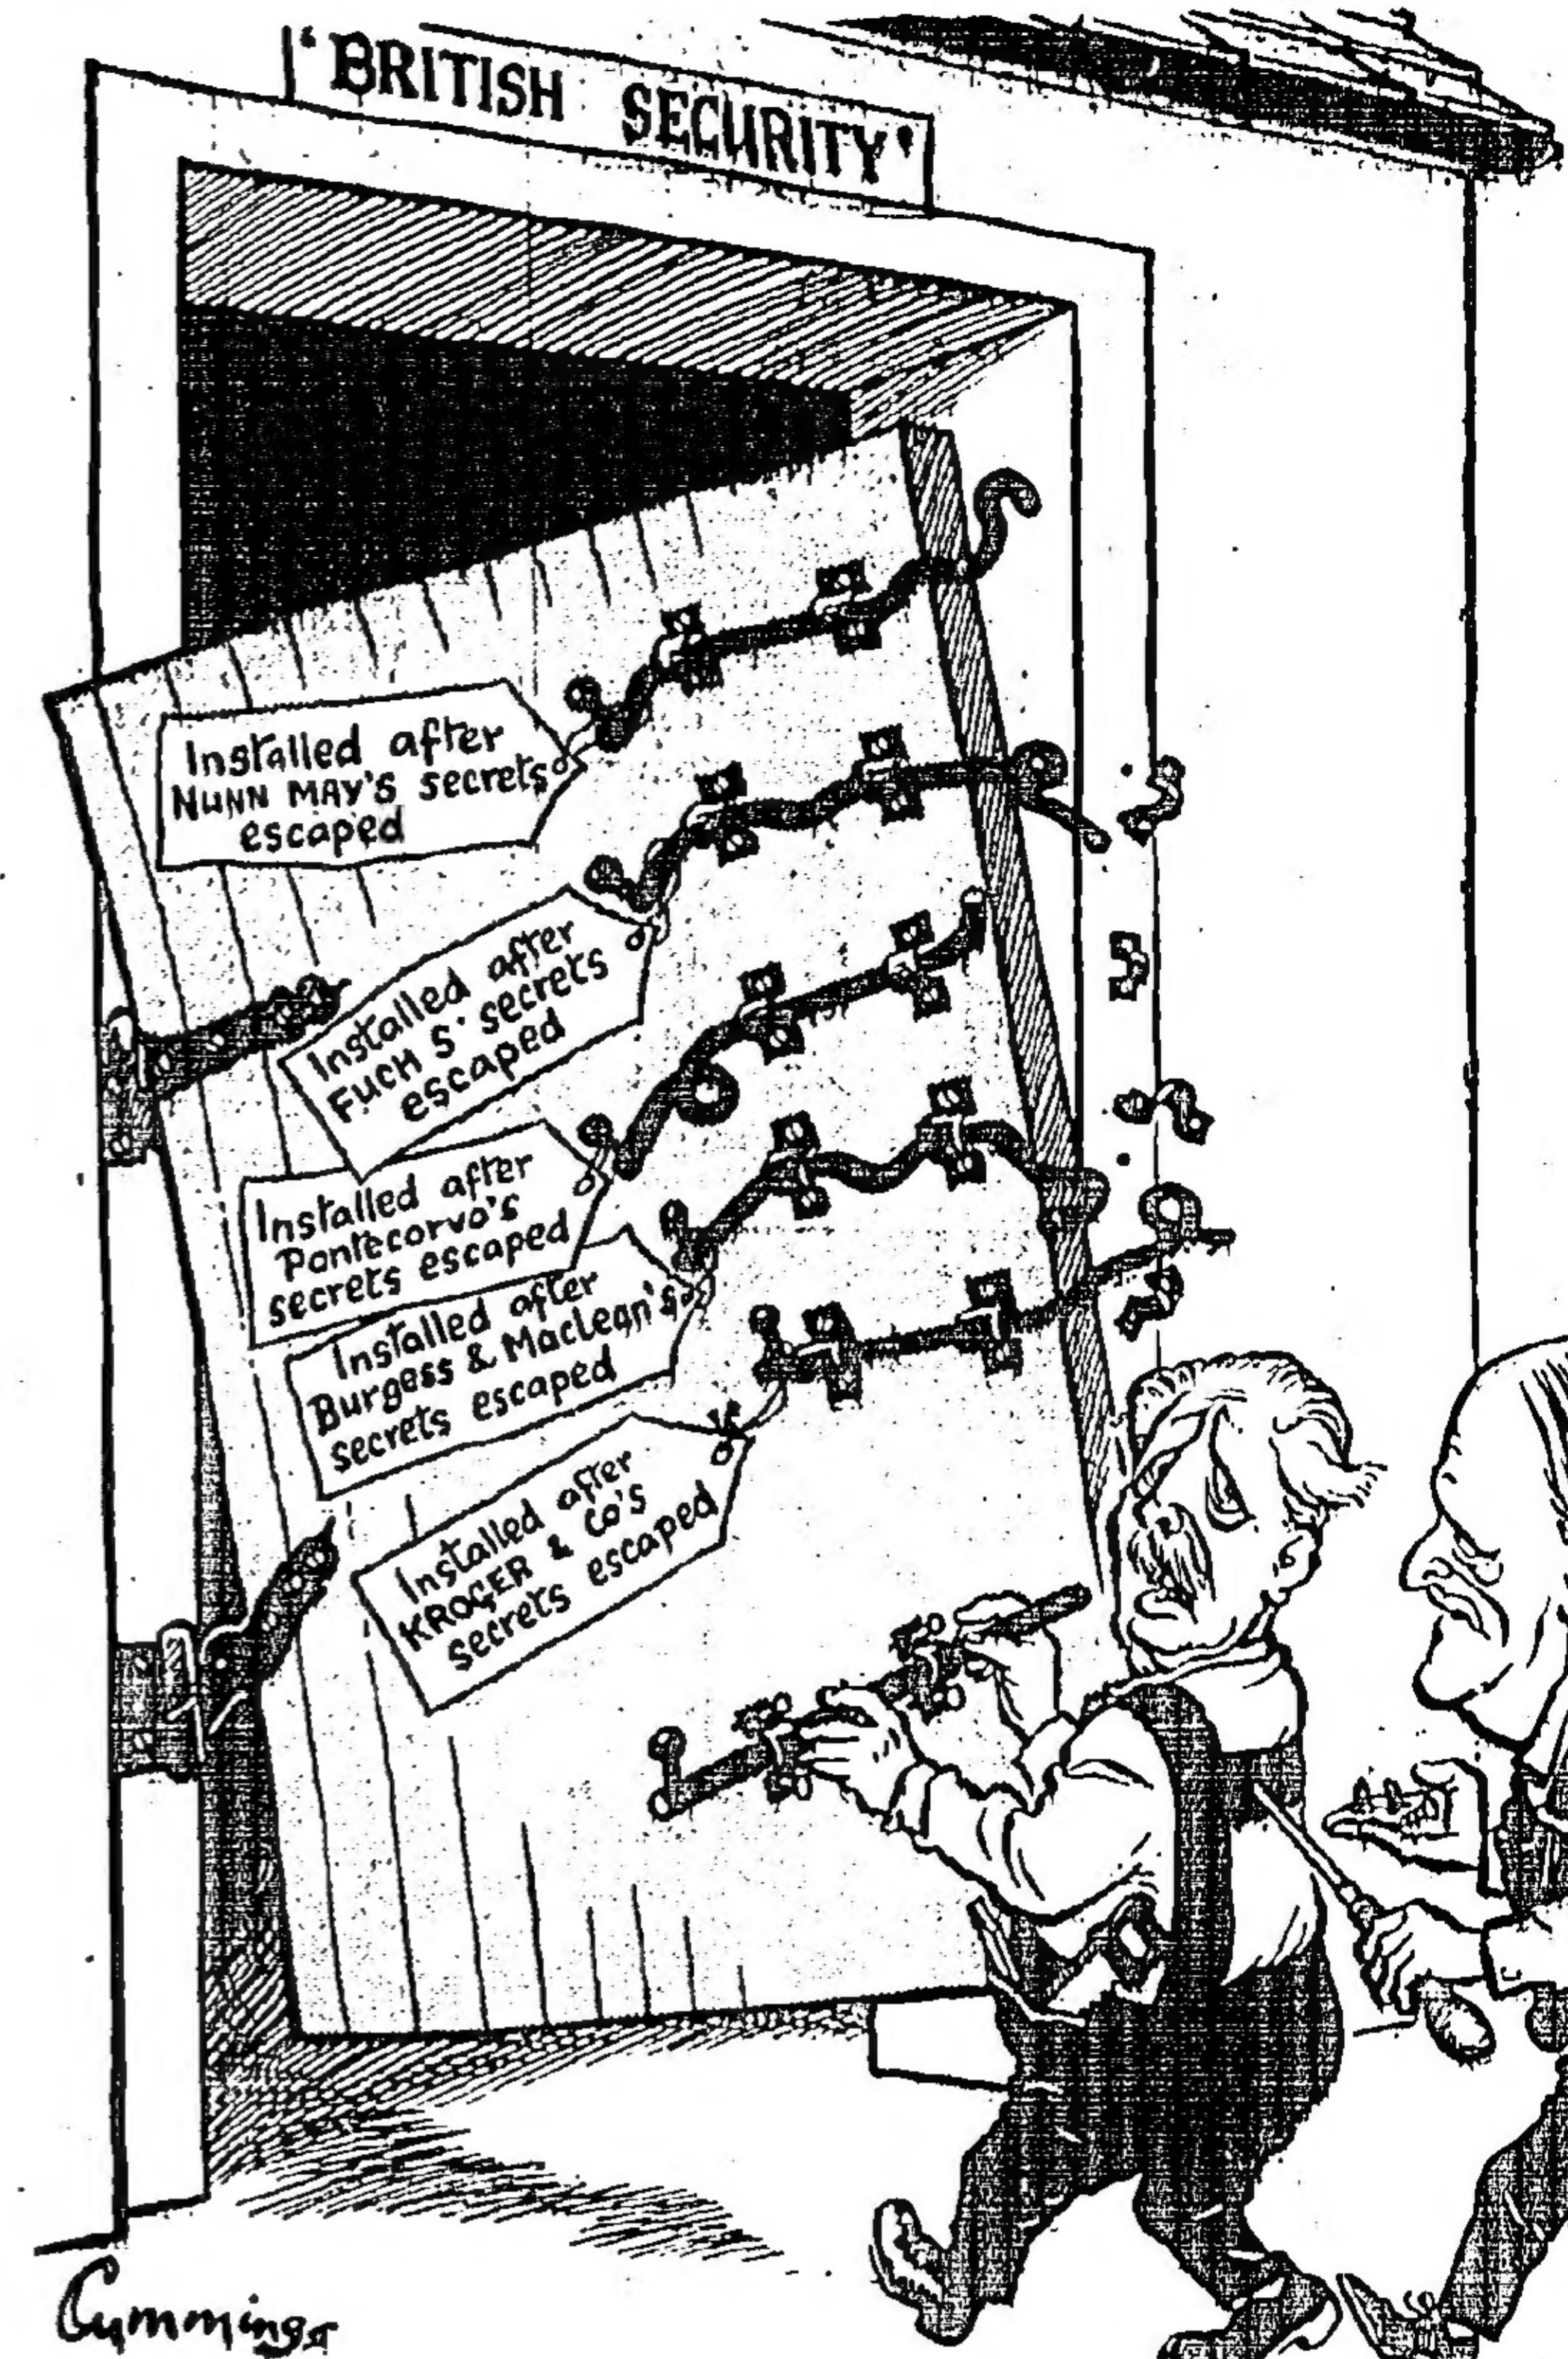

Mckenzie was in a way already made cricket history, hitting the Test team like a bombshell after only one full season in first-class cricket.

"He'd just finished his P.T. course and was on its first day as a teacher when the news came through of his selection," I was told.

"But he's an exceptionally nice lad—we call him 'Garth' 'cos he's a like the bloke in the comic-strip."

And for the rest, they are all family men.

For them, I think, the world-away separation proves the toughest Test of all.

"What's so depressing is that we can't even lock the stable door after the horse has escaped!"

London Express Service.

SECURITY

— and this pantomime panic to paper over the cracks

HARRY HOUGHTON, the Navy secrets spy, whose appeal against 15 years' jail was dismissed, was probably the most ham-handed foreign agent in the history of espionage.

He broke every rule in the spy's self-preservation code. Yet he operated successfully for seven years under the noses of security men without being caught.

A SPY is supposed to avoid drawing attention to himself. Houghton was loud-mouthed, boastful, and a drunkard.

A SPY should never arouse suspicion by blatantly living above his normal income. Houghton flashed wads of money in pubs, bought a succession of cars, and entertained lavishly. When serving abroad he operated on the black market.

A SPY should never confide in anyone outside his network. Houghton dropped enough hints to arouse the suspicions of his wife with whom he was on such bad terms that she reported him to his superiors.

The facts become even more fantastic when it is remembered that such defects of character were displayed just as obviously by both Burgess and Maclean.

Incredible

Houghton's case demonstrates that not only is Britain's security system incompetent but that it never learns from its former mistakes.

The Fuchs case proved that unless people are born of British parents in Britain their ties of loyalty may be too tenuous for them to be safely trusted with secrets.

Yet the Foreign Office failed to apply this costly lesson when recruiting George Blake for intelligence work so secret that he was able to give to the Russians the names of other

by CHAPMAN PINCHER

Suspicions

When serious doubts about him were raised while he was attached to a Foreign Office Intelligence department in Warsaw he was returned home.

But the doubts were not reported to the secret Underwater Weapons Establishment at Portland where he was transferred.

When Mrs Houghton reported her suspicions to the Portland security authorities, they said her husband had been transferred to a harmless position in the dockyard, but they did not tell Admiralty headquarters.

When the Admiralty security chiefs found out through reports from a dock-gate keeper that Houghton was spending too much money they did not tell MI5. Only when MI5 found out through its own resources was serious action taken.

Umbrella

Pantomime panic to paper over security cracks so wide that all the public can see them is an outward sign of the cloak-and-dagger atmosphere in which British security operates.

Just as the Foreign Office still tries to operate. It is partly due to the Foreign Office's holler-than-thou posture suggesting that whatever the Russians may do we would never indulge in such a dirty game as spying.

But mainly it is another deliberate attempt to use security as an umbrella for incompetence and flops.

Now Dr Roscoe Kandle, New Jersey's Commissioner of Health, has traced some of 1,014 cases of New Jersey's hepatitis to the inland clam beds and, presto, in the night the Vesty Clam beds have been closed to human contacts.

Today they lie deserted

Now Dr Roscoe Kandle, New Jersey's Commissioner of Health, has traced some of 1,014 cases of New Jersey's hepatitis to the inland clam beds and, presto, in the night the Vesty Clam beds have been closed to human contacts.

Between them they furnish 727 U.S. newspapers with another advice to the love-lorn. The one conflict that the twins have not succeeded in solving is their own. They don't and won't speak to each other.

New Jersey, it must be explained, is scapegoating the little clam, for a deeper and darker hepatitis scandal has hit the Jersey courts.

In Mississippi the clam's rich relation, the oyster, was deemed responsible for another outbreak of hepatitis, so we may presume that the lovely lush sea-food restaurants of America are going to suffer some empty tables in the merry months to come.

New Jersey, it must be explained, is scapegoating the little clam, for a deeper and darker hepatitis scandal has hit the Jersey courts.

In the wartime German handbook on the British Secret Service, Hitler wrote: "The British have brought Intelligence work to a mastery unique in the annals of history."

His words now seem to have been an epithet.

(London Express Service).

The ban

Epitaph

"This system has now been thrown into disrepute by blanket restrictions designed, as in the Blake case, to cover up disastrous failure and save personal reputations.

In the wartime German handbook on the British Secret Service, Hitler wrote: "The British have brought Intelligence work to a mastery unique in the annals of history."

His words now seem to have been an epithet.

(London Express Service).

The clam becomes this city's Public Enemy No. 1

FROM JEAN CAMPBELL

Twenty-six of his luckier Chicago and Popo in Minneacola.

Eppi has written a series of small books for teenagers called Necking, Petting, Dating and Teenage Drinking. She is considered to be "a little more serious a little more often" than her sister.

But Popo would challenge this as it was she who plumped the precept: "Dear Teenager, don't date out of your faith unless you are absolutely certain that there will be no heartaches should you marry out of your faith."

The sisters are sharp and succinct in their advice. Sometimes they advocate "help" in form of marriage counsellors or psychologists for their correspondents. There is nothing either prim or sentimental in their writing. It swings and slings.

Here is a typical letter:

"Dear Ann Landers, A man 12 years my junior talks of marriage, but his conversations only wind up with questions about my financial situation. I have been warned that he is insincere. If this is true, why does he swear he worships the ground I walk on?"

Eppi answers: "He probably thinks there is oil under it."

Always on Sunday

The twins were in Iowa in Sunday to Russian Jewish immigrant parents.

One was named Pauline Esther and the other Esther Pauline. After a double wedding their husbands quarrelled bitterly and today Eppi lived in a house of a game for

Joan sticks to milk...

JOAN PLOWRIGHT, now Lady Olivier, is living at the Algonquin Hotel off Broadway, although she is no longer playing her prize-winning role in *A Taste of Honey* on Broadway.

The Algonquin is the favourite place for visiting British writers and actors. It has dark mahogany walls in the hall and comfortable brown leather chairs.

At night there is a late bullet supper for theatre-goers and theatre players, but the talk is seldom loud except when Brendan Behan, another guest, bursts into sudden song.

Joan is drinking only milk and her eyes are sparkling with motherly joy over her future child. She told me she would like to buy a small house in Chelsea when she returns to England.

Close friends of the Oliviers say that Sir Laurence's pride and love for his new young wife have taken the shadows from his brow and given him an easy way with the world about him.

Sunny Sunday afternoons. They ask their parents to take them across the Hudson River to Palladian Park, the biggest amusement park in the country.

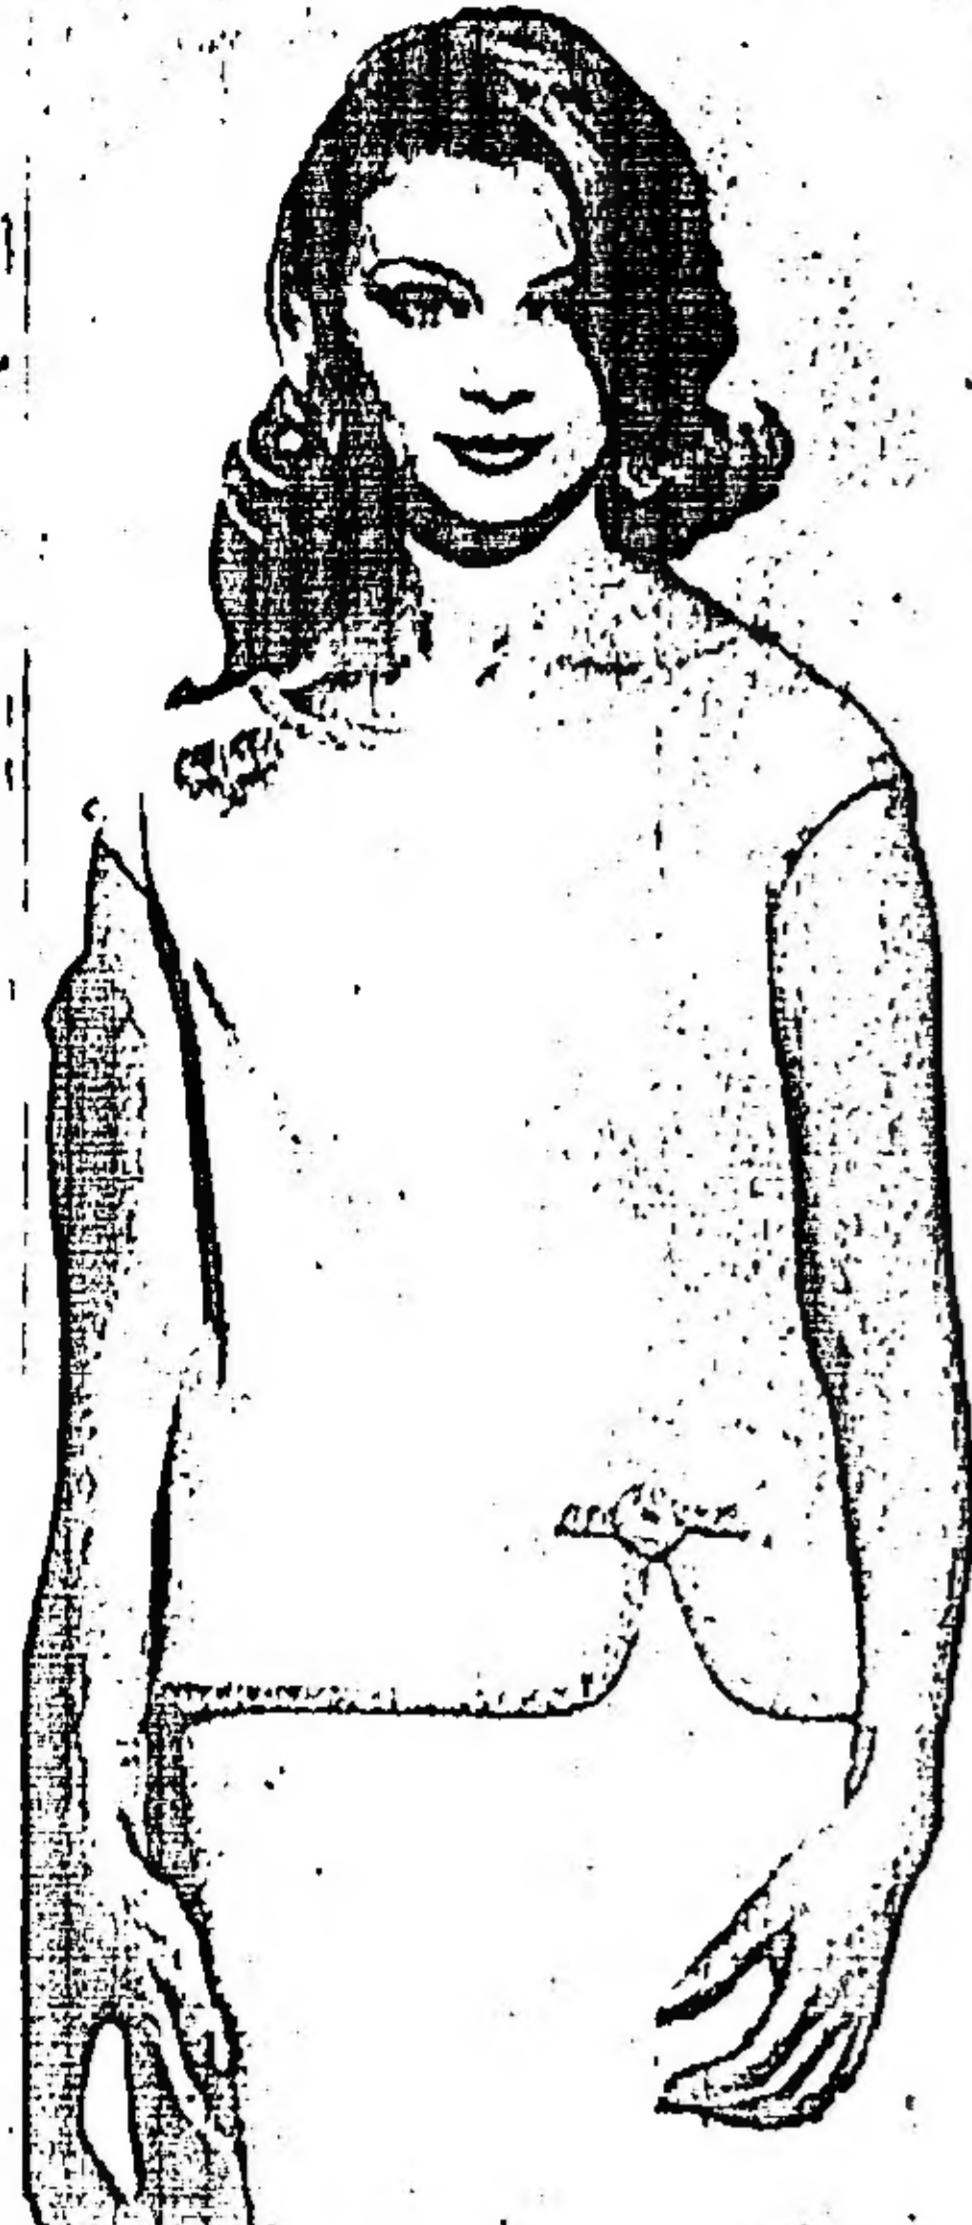

Once among the big wheels, the merry-go-rounds and the ghost trains they slip away from their parents and turn themselves into the administration office.

They explain that they are lost—hopelessly lost and the administration feel they ought to entertain and nourish the lost children. Free toll for "the lost" last Sunday was 67, ice-cream cones, 90 cotton candies and 90 giant-sized lollipops.

(London Express Service).

WOMANSENSE

BLUE-PRINT FOR A PERSONALITY JANE ROGERS ASKS:

IMPACT-MAKING party-sparkler in silver Lurex and pure white wool with a nicked hemline.

London. SOME women dress to please their husbands. Some dress to follow fashion. But the one who makes the most impact and makes the other women jealous when she walks into a room is the one who picks personality clothes for herself.

Top among the personality dressers I know are ex-model Barbara Goalen who could look chic in a sack, and Anne Ford, the hard-working director of one of England's top stocking firms. No' for Anne the fussy hat, the long white gloves and six rows of pearls.

Whether she is dining at Claridges or just snatching a sandwich at the pub round the corner, she's more than likely to be wearing a '60s generation jerkin and tight skirt in black leather, with black lace stockings to match, and long gipsy earrings dangling from her ears. Say what you like about Anne's fashion sense, she certainly makes an impact wherever she goes.

The same could be said of another impact-maker, Marjorie Mendes, who until recently fashion-edited one of Britain's top-selling fashion magazines. If Marjorie liked a pair of shoes or a dress she would never buy the same style in anything up to a dozen different colours.

Clothes that make an impact on people take some finding in these days of mass production. But I have managed to track them down in this season's collections, all the same.

The dress with impact which I found recently was a pagan-looking sheath that looked as though it might have been made from a tiger-skin rug. In fact it is made from brushed Acetate, lashed casually round the waistline with a cat-whip belt. It is

the kind of dress that makes even the roughest woman look noticeable, and it sells at a price that is easy on the purse.

The coat with impact is a straight French copy of a greatcoat, with a huge turn-down collar, and a belt casually slotted around the hips. It is made in fake leather in a delectable selection of colours, and has a detachable lining of shaggy Mongolian lamb fur.

The suit with impact looks as though it has been knitted up on stock needles, for it is made from fluffy finely-ribbed wool. But it will keep its shape from now until Doomsday, for it comes from a new family of fabric—the foam-backs. The material is laminated onto a narrow bucking of plastic foam which makes it light, yet warm.

The fabric with impact coming into the shops now is a new cuddly form of Courteille, doekskin. It is soft and furry, and unbelievably light, yet it washes like a dream and needs virtually no ironing. We will be seeing a lot of this new 3-D fabric for suits, travel-coats and casual jackets.

The shoes with impact are made by the French designer Charles Jourdan, yet they are on sale now in London for around £4 (HK\$17). They are square-toed and bow-tied pumps, made from patent leather. An eye-catching accessory to doll up last year's dress. And the handbag with impact goes with

The shoes with impact looks as though it has been knitted up on stock needles, for it is made from fluffy finely-ribbed wool. But it will keep its shape from now until Doomsday, for it comes from a new family of fabric—the foam-backs. The shoes with impact To prove how easy it all is, the makers got two amateurs in full evening dress to paper a wall while we watched. Ready-pasted paper is available now in a limited number of designs, is ready-trimmed and costs little more than the more orthodox variety. Later on the makers hope to extend their range to cover other more adventurous designs.

CHILDREN'S CORNER

A Game Of Pretend

-Knarf And Teddy Make Believe They Are Cats-

By MAX TRELL

"I WISH," Knarf, the Shadow Boy with the Turned-Around Name, was saying to his two best friends Teddy, the Stuffed Bear, and Hiawatha, the Small-Sized Wooden Indian, "that I were a Cat."

Teddy glanced at Knarf in great surprise.

"A Cat?" he repeated.

"Why?"

Hi kept quiet

Hiawatha didn't say anything. He was sitting on the floor with his legs tucked under him and a blanket wrapped around his head and shoulders.

Teddy pulled the corner of the blanket aside and called in,

"Karf says he wishes he were a Cat. What do you think of that, Hi?"

Hi just grunted.

"What did he say?" Knarf asked as Teddy folded the corner of the blanket back in place.

Why a cat?

"I don't know," answered Teddy. "Anyway, why do you want to be one, a Cat I mean?"

Karf said he wanted to be a Cat because Cats always fell on their feet.

"They land on their feet when they fall, is that what I mean?" he said.

"That's a good idea," said Teddy. "When I fall, I always land on my face. I'll tell Hi!" he said.

Teddy pulled up the corner of the blanket again and called in,

"Cats always land on their feet when they fall. Is that the reason why Knarf wants to be one? I always land on my face."

"What do you land on when you fall, Hi?"

Just grunted

Hiawatha grunted again. "Where?" asked Teddy. But this time Hiawatha didn't even grunt.

Rupert and Gwyneth—21

Rupert takes hold of one of the magic cookies very gingerly, and Tabitha stares at it, making funny little excited noises. "I don't like the taste of eating this old Podgy," he says. "Meanwhile, Gwyneth says, 'Take one of the witch's books out and under the blanket where Hiawatha was hidden, they heard the sound of laughter.'

AUSTRALIANS IN SIGHT OF 4th WIN Glamorgan fighting to avert innings defeat

Cardiff, May 22. The Australians look set to register their fourth successive victory tomorrow. By the close of play against Glamorgan here, the county, who had followed on 167 runs behind, still needed 119 runs with eight wickets left to avert an innings defeat.

Scores were: Australians 402, Glamorgan 235 and 48 for two.

So far the match has been a quiet triumph for all-round player Alan Davidson, following his undefeated 68 with the bat, Glamorgan bowled at his fastest for the first time on the tour and captured five for 63 in Glamorgan's first innings. Jim Prosser made a defiant 54 in just over 2½ hours, hitting eight fours.

Limitations exposed

In Glamorgan's second innings, Davidson dismissed Gollif Parkhouse without a run on the board, and together with Norman O'Neill inspired the tourists to give a much improved fielding display.

Earlier Glamorgan, though in the three early first innings, had suffered increased inexperience. The limitations of the Australian attack, Davidson explained.

One of the other players to clearly strengthen on a day which saw the 151-run stand between Lanning Rhine and Ian Evans a disappointment. The experienced Gilbert Parkhouse batted with complete ease for the top score of 50,

which included 12 fours in a stay of two hours, 40 minutes.

Test all-rounder Peter Walker was also going well before he was unluckily run out while late in the innings Jim Prosser made a defiant 54 in just over 2½ hours, hitting eight fours.

PETER MAY COULD MISS FIRST TEST

Willett seizes his chance at the Oval

By ARCHIE QUICK

Sunshine and shadow all in one day for Surrey at the Oval in the first of their two matches with the Australians.

Peter May retired with a groin injury which could ruin his chances of captaining England in the first Test Match at Birmingham two weeks hence, but a 28-year-old garage proprietor's son from Sanderstead showed such scant respect for the Tourists' varied howling that one was left wondering why he has not become a permanent member of the first eleven before now.

Michael Willett is the name, and whether it was the fast bowling of Davidson, Mackenzie of Mason or the twisters of Kline, Mackay or Simpson, the boy treated them as silly. This was two months ago, and followed on his cracked twenty-one fours in a day's aggregate of 97. He matched his skipper both times they were batting together, yet he has been with Surrey twelve years with only an occasional outing. It the senior side.

The Australians were cock-a-hoop at getting Surrey on the floor so easily, for they remembered what Jim Laker did to them in 1956.

Worth Test place

Laker has gone—they tell me he does not even pay to go into the ground now—but Tony Lock remains, and although the four wickets he captured were expensive, he still looked worth a Test place. Significantly, he bowls these days with his sleeves rolled up as if to show to the world his new action had no bent elbow in it!

There are only two leg-spinners in the country worth the name, Tommy Greenough and Doug Allen, and while they are showing only mediocre form, Lock must remain the answer. I saw Greenough against Essex and the Aussies would have carted him out of the Parish of Kentington! Allen, they tell me, is not much better to now. Lock's additional advantage over them—he is left arm, of course, against them right—is that he is the outstanding close fielder in England—still!

The big query hangs over May. In the first Innings he got 58 good runs before getting run out. He square cut Kline, started running, was rightly sent back by Roy Swetman and never attempted to recover his ground. It was nothing like the true May. Then in the second Innings after gathering 26 he did not resume after tea.

It looked as though the groin hurt he sustained came when he stretched forward to Bobby Skipton. The official econ-

THE WICKETKEEPER IS 69 YARDS AWAY WHEN DAVID LARTER STARTS TO BOWL

DAVID LARTER, Northamptonshire's 6ft. 7½in. bowler, is the tallest player in cricket. And he takes the longest run. In fact, running and walking, he covers a quarter of a mile in every over he bowls. When the high-speed camera caught the 21-year-old paceman in action against Hampshire, his run was measured at 31 yards, and his follow-through at eight yards.

In the picture you can see the gully and the wicket-keeper (16 yards back),

but the slips are standing ing out of camera range. Is Larter's 31-yard run, which he covers in 18 strides, really necessary? His captain, Roman Subba Row, says: "David has to find his own rhythm. At the moment he needs this run, and as we are averaging 20 to 21 overs an hour I don't mind it a bit."

"In fact I don't want David to alter his run. I want him to settle down. He is a great prospect. He is not a tear-away fast

bowler — he swings the ball both ways and is aiming at accuracy as well as speed."

On average Larter gets through an over in four minutes. That compares well with Trueman, Statton, or Australia's Davidson.

I believe that Larter, like his former county colleague Frank Tyson, will eventually save energy and time by cutting his enormous run.

CRAWFORD WHITE.

Sir Stanley Rous: Everton can go ahead if U.S. Soccer League organisers assume responsibility

Rome, May 22.—Sir Stanley Rous, President of the English Football Association said tonight he had nothing against English participation in the New York Summer Soccer Tournament.

Commenting on a report that

Everton, the First Division soccer club representing England at the tournament, was considering withdrawal from the tournament, Sir Stanley said:

"I have received a cable from Alan Hardaker, Secretary of

the English League, informing me of the matter. "I have enabled him back saying that England can go ahead if the United States Football Association assumes full responsibility for the tournament."

He said Everton would participate in the tournament if these requirements were fulfilled.

Sir Stanley said it was up to the Americans to organize the tournament to take the next step.

"We have demonstrated our good will," he commented.—AP.

"These must be filed at once to FIFA," said Sir Stanley. "We must know who is going to safeguard the interests of the English team representing our country."

He said Everton would participate in the tournament if these requirements were fulfilled.

Sir Stanley said it was up to the Americans to organize the tournament to take the next step.

Dicta Drake wins the Grand Prix Du Printemps

Paris, May 22.—Mme Leon Volterra's colt Dicta Drake, who is engaged in the Doncaster St. Leger, won the Grand Prix Du Printemps over a mile and a half at Saint Cloud today.

Ridden by Maxime Garcia, he scored by three lengths from Farlam, with Pin Point two lengths further away third of the 18 runners. Clary, ridden by Australian jockey Neville Sellwood, was fourth.

Dicta Drake, a son of Epsom Derby winner Phil Drake out of Dictra, took the lead as they went into the straight and won easily.

Parimutuel dividends to a one-franc stake were: win 5.30 francs; places 2.40, 4.60 and 6.30.

M. J. Stern's Night and Day was favourite at a shade under 2 to 1.—China Mail Special.

Sacked

Sheffield, May 22.—Ralph O'Donnell has lost his job as a schoolteacher.

The Sheffield Wednesday centre-half, who returned with the club from a tour of Nigeria today, said: "I have been given the sack because I went with Wednesday on this tour". The Sheffield club played four matches on the tour, winning three and drawing the other.

AP.

Rinaldi says he has learned how to beat Moore again

Haines Falls, May 22.—Giulio Rinaldi, who meets Archie Moore for Archie's share of the world light heavyweight boxing title in Madison Square Garden on June 10, said today he learned one thing when he beat the venerable Moore in a non-title bout in Rome last October.

on the whole looked strong and moved well. Mock lost a 10-round to Rinaldi last February 24, and has considerable respect for him.

Advice

"I think he will go the distance against Moore," he said, "and if he does he'll get the decision. I definitely don't advise him to stand toe-to-toe with Moore. If he tries to slug with him, that's his only chance of getting knocked out."

Rinaldi, 26, has a 25-5 record and has won nine fights in a row. He now has boxed 49 rounds since arriving here on May 10.—AP.

FORMER NATIONALIST ARMY OFFICER ON MURDER CHARGE

Axe said used to kill girl

A former Chinese Nationalist Army Officer faced trial in the Criminal Sessions this morning on a charge of murdering the daughter of his former superior officer.

The man, Ho Chung-ying, a 33-year-old Lam Kwai-lan, alias Ho Kwan-lan, on the morning of March 5.

The Crown alleges that the girl was hacked on the head by the accused with an axe and died of fractured skull and damaged brain. The girl's mother, who was accused had been living with the accused in the attack, was also wounded in the attack, the Crown alleges.

In his address to an all-male jury, Mr. M. Morley-John, Crown Counsel, said accused and his wife, with a woman Wong Sui-ling, and the young girl in a room in Shek Kip Mei.

Accused first met Wong in 1947 in the interior of China where Wong's husband, Lam Ching-ming, was then an officer in the Chinese Nationalist Army and accused was his subordinate. Accused became sick at that time Mr. Morley-John went on and was buried by Wong.

BECAME SICK

Shortly afterwards, Lam was taken prisoner and accused took care of Wong and her daughter.

Some time later, accused came to Hongkong and Wong after many difficulties also managed to find her way to the Colony with her daughter. She met the accused again and they lived together with the young girl, Crown Counsel said.

"She (Wong) did not know where her husband was and did not discover his whereabouts until last August when she found that he had also managed to make his way to Hongkong," Mr. Morley-John said.

"They met and he naturally wanted to have his wife and daughter returned."

NEW NAME

At that time, Mr. Morley-John said, the girl had also acquired the name "Ho Kwan-lan" as the accused wanted to have the girl as his own daughter.

Wong told accused that she had found her husband. Accused then left Wong and her daughter. However, a month later, accused returned to the house but Wong did not wish to take him back since her husband was in the Colony.

Kenneth H. C. Fung, son of Mr and Mrs Fung Ping-fan of 14 South Bay-road, Hongkong, is one of 53 members of the Harvard Glee Club going on the Club's Far Eastern Tour this summer. The members of the group have been studying the customs of the many countries they will visit, and at the various concerts they will sing each country's national anthem. The group will arrive in Los Angeles on June 16, the tour group will sing in eight countries ending on Aug. 17, with a concert in Athens.

Kenneth Fung, who attended the Fountain Valley school in California, is doing graduate work in Architecture at Harvard. He is shown here with Prof. Elliot Forbes.

More factories to issue Origin Certificates

One hundred and eighty-two factories were registered by the Commerce and Industry Department in April for the issue of Certificates of Origin and Commonwealth Preference Certificates.

Out to help achieve world peace

A group of American businessmen are in Hongkong in the course of a world tour to "advertise the great state of Florida" and to "help achieve world peace through a better understanding of the American way of life."

Travelling with the group of 26 men is author and businessman Needham Christopher Hines, who wrote the book "The Truth About Florida."

Mr. Hines said he felt sure the delegation will "serve as a stimulus to tourism and world understanding."

The delegation have unanimously voted that "Hongkong is a wonderful place" and that all tourists from the US should "make it a must on their itinerary."

A film of the delegation's tour is being made by the brothers Ralph and Richard Renfle for showing on television in Miami.

Court told PC was shot at close range

A young policeman who was trying to arrest a man after a Chinese New Year's fireworks incident, was shot in the chest at point blank range with his own revolver, Mr George Willis, Crown Counsel, said at the Criminal Sessions today.

Govt opens two more adult centres

Two new Adult Education and Recreation Centres have been opened — one at Shaukiwan, on Hongkong Island and the other at Wong Tai Sin, in Kowloon — bringing to eleven the total number of Adult Education and Recreation Centres now in operation.

These 11 centres have a total membership of 29,725 states the Director of Education, the Hon. P. Donohue, in his latest review of the work of the Colony's adult education centres.

FIRST QUARTER

During the first quarter of this year, 35 teachers completed the nine-month training course for centre supervisors. In addition, a special course for the training of voluntary helpers was organised. Eighty people from various centres are attending the course, which ends in June.

In order to provide teachers of housecraft subjects with added skills and opportunities for discussing teaching methods, three refresher courses, attended by 91 teachers, were started in March.

Newspaper hawkers in fight

A newspaper hawker who injured another with a screwdriver over a stall, was fined \$75 by a magistrate in Kowloon this morning.

The court was told that the defendant Wong Hon-ming, 38, had sold his stall outside a cafe at Waterloo-road to complainant Yip Kwan-sang for \$500 on an instalment basis.

When Yip stopped payment, Wong asked him to leave the place, and the fight ensued.

Mr. C. P. Lal, representing the defendant had drawn the screwdriver in self defence when attacked by Yip and two of his sons on Saturday.

The injury was not serious, he said.

ENGLISH, KUOYU AND YOGA ARE TAUGHT HERE

A regular class in Chinese penmanship has been started at the Wong Tai Sin Community Centre following a successful competition which attracted 60 entries, states the Director of Social Welfare, Mr D. W. B. Baron.

Classes in English and Kuoyu are held daily in addition to film shows and classes in Yoga, shadow boxing and folk dancing. Films on Chinese Opera are particularly popular and draw audiences of up to 1,000.

The Community Centre itself continues to attract a great number of visitors, both locally and from abroad.

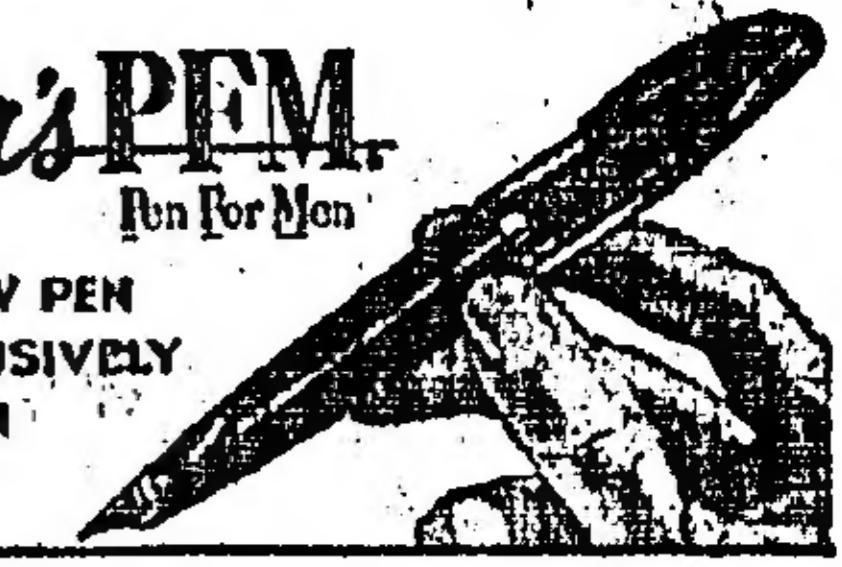

The library caters for nearly 1,000 adults and children daily, books on Chinese fiction being the most popular. A total of nearly 8,000 books were on loan to readers at the end of March.

The clubs for fathers and mothers continue to be well attended.

From the Files

25 years ago

May 1936

ONE of the main items for discussion at the conference of the International Labour Office which meets tomorrow will be the suggestion of a forty-hour week for workers. The principle has been approved by most countries, having been thoroughly discussed at last year's meeting, and it is expected that the application of the shorter working week will be immediately enacted, in at least five industries.

The industries in which the forty-hour week will be first adopted, according to the Labour Office's plans, will be building, construction and contracting, textiles, public works, coal, and iron and steel.

It has been the unfortunate lot of a young Chinese woman to be the victim of confidence trickster. A man to whom she entrusted money and jewellery disappeared and has not been traced.

The story originated in the Central Magistracy. It appears that the woman went there to apply for a summons for assault. She was accompanied by a man who had told her that he would be witness when the case was heard. The man is then alleged to have said, "The magistrate won't allow you to wear jewellery. Give it to me and I will pass it on to a Chinese detective for safe custody." Believing what he had said, the woman parted with her jewellery, comprising six gold finger rings, a pair of earnings a jade buckle and \$60 in money.

The man told her that he would return in a few minutes. She waited patiently for hours and saw no sign of him. The woman has reported the matter to the police.

ONE of the largest shipments of bloodied dogs in the history of the Philippines was brought in on the Empress of Canada last week by Mariana Eason, of Talisay, Occidental Negros. The animals, eleven in all, will be taken south on the Mayon to be kept by Mr. Lascos and members of his family. They are not for sale.

The dogs were acquired in Tokyo, shipped overland to Kobe, and then brought to Manila by steamer. Eight of them are Great Danes. Three are English bulldogs. They will be used for watch dogs and for pets.

More pupils inoculated

Pupils in more than 37 schools were inoculated against diphtheria or small-pox under the School Health Service scheme during the first three months of this year.

Medical and dental inspections were carried out in a number of schools in the same period, states the Director of Education, the Hon. P. Donohue.
